

# EN-CREASE PROFITS ENERGYLOCK

RADIANT BARRIER SHEATHING

EnergyLock  
ANOTHER QUALITY LANGBOARD PRODUCT

## LOCK IN ENERGY SAVINGS AND LOCK OUT HIGH COOLING ENERGY COSTS WITH ENERGYLOCK

Energy costs continue to rise with homeowners and developers requesting builders to use energy efficient products. EnergyLock from Langboard is a value added product where every one is a winner. You increase your profits and the customer saves big bucks on heating and cooling costs.

EnergyLock is a radiant barrier installed in buildings to reduce summer heat gain and winter heat loss. Test have shown that radiant barriers reflect 97% of radiant heat. Extensive testing by the US Department of Energy, The Florida Solar Energy Center, Tennessee Valley Authority, and The University of Mississippi confirm that radiant barriers provide significant resistance to heat transfer.

- **EnergyLock** heat barrier sheathing installs just like regular roof sheathing with the foil side facing the attic
- **EnergyLock** prevents up to 97% of the suns heat from entering the attic, reducing the attic temperature
- **EnergyLock** reduces the run time of air conditioning units and allows the units to operate more efficiently

### SPECIFICATIONS

- Available in 7/16", 15/32", 5/8" OSB (other sizes available upon request)
- Meets ASTM C 1313-97 standards for Sheet Radiant Barriers
